

STATIC CONTROL COMPONENTS, Inc.

ESD PRODUCTS DIVISION

The SCC Advantage™

SCC Brand products offer customers high quality, low prices, and on-time delivery. This advantage has made SCC the world's largest manufacturer of static shielding bags, moisture barrier bags, personnel grounding products, and workstation accessories.

Lower Cost

By combining large scale, high efficiency production with world class technology, SCC produces products that are price-competitive worldwide.

Higher Quality

SCC product reliability is assured by testing during each step of the production process. Our Quality Assurance System operates under ISO 9000 guidelines.

Better Support

Large product inventories, stocked in strategically located distribution facilities around the world, assure on-time order delivery.

Disposable Foot Grounder

Ground visitors and temporaries cost effectively.

The SCC 5402 Disposable Foot Grounder is a low cost personnel grounder that is ideal for one-time or limited use applications. By providing a conductive pathway from the person to the ESD-safe walking surface, the SCC 5402 Disposable Foot Grounder provides excellent, temporary static protection at a low price.

Although initially designed for use with visitors or temporary employees, the SCC 5402 Disposable Foot Grounder is also well suited for field service and remote electronic equipment installation applications.

Adhesive at one end of the foot grounder secures it to the bottom of your shoe. The other end tucks inside the heel of the shoe without the need for adhesives or metal clips that might mar the upper part of your shoe.

The bright yellow and black stripes makes visual verification easy and simple.

The 5402 Disposable Foot Grounders are packaged 100 per bag, and come with instructions.
