Bag Length

The maximum length of RipTop bags is 12 inches from the opening to the zipper.

How it Works

SCC's RipTop bags are made with the bottom open and the bag closed (fold) above the zipper. Product is loaded from the bottom and is kept inside the bag by heat sealing across the opening. To access the product, the customer Rips the Top off of the bag above the zipper. The zipper allows the customer to use the bag again.
