

RoHS “Lead-Free” Label

Identify your RoHS compliant products,
equipment and workstations.

The SCC Advantage™

SCC Brand products offer customers high quality, low prices, and on-time delivery. This advantage has made SCC the world's largest manufacturer of static shielding bags, moisture barrier bags, personnel grounding products, and workstation accessories.

Lower Cost

By combining large scale, high efficiency production with world class technology, SCC produces products that are price-competitive worldwide.

Higher Quality

SCC product reliability is assured by testing during each step of the production process. Our Quality Assurance System operates under ISO 9000 guidelines.

Better Support

Large product inventories, stocked in strategically located distribution facilities around the world, assure on-time order delivery.

Use SCC RoHS ('ro-haus') labels to mark your lead free products, or to designate equipment and materials that are used for lead free production. This green 1.75 x 1.75 inch adhesive label shows the “Pb free” symbol. 500 labels per 3 inch paper core.

About RoHS

The European DIRECTIVE 2002/95/EC *Restriction of the use of Certain Hazardous Substances in Electrical and Electronic Equipment* or “RoHS” mandates that new electrical and electronic equipment must not contain lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBBs) or polybrominated diphenyl ethers (PBDEs) beginning on July 1, 2006.
