

Common plastics can charge to thousands of volts. Normal sheet protectors may keep your documents safe, but risk exposing electronic devices to the static electricity they create. SCC static dissipative sheet protectors keep static at bay and protect your documents.

SP8.5X11

Sheet Protectors

SCC sheet protectors are made from durable static-dissipative polypropylene (polypro) plastic. Polypro plastic is better than traditional PVC or polyethylene sheet protectors because ink from photo copies will not stick to it. And because of its added strength, the thickness can be reduced. A thinner sheet protector allows you to put more documents in a binder. Glare is reduced by embossing. Each sheet protector is printed with the ESD protective symbol and a yellow stripe to clearly identify it as static dissipative.

Features

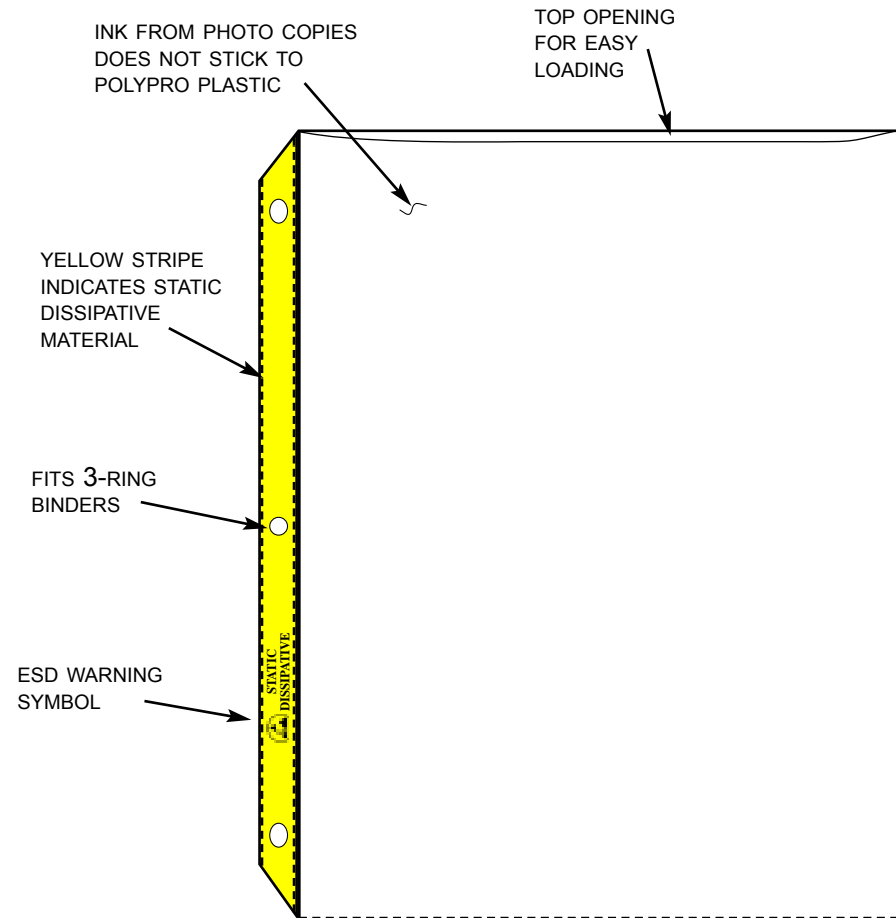

- Static Dissipative for ESD safety.
- Non-stick polypro plastic keeps ink from photo copies from sticking to sheet protector.
- Stronger polypro plastic allows the sheet protector to be thinner, allowing more pages to fit into a binder.
- Printed with ESD caution logo and yellow stripe for easy identification.
- Embossed pattern reduces glare.
- Top loading for easy access and secure document containment.
- Holds 8.5 x 11 inch documents.

Specifications:

Material:	Polypropylene (70% recycled content)
Paper Size:	Fits 8.5x11inch pages
Style:	Top loading, fits 3 ring binders.
Surface Resistivity:	10^{9-11} ohms/square ASTM D257
Static Decay:	<0.13 seconds
Thickness:	3 mils +/-15%
Packaging:	100 sheets per box
